

Working together to make the textile chain more sustainable? That is permissible!

Authority for
Consumers & Markets

Examples of collaborations

Awareness campaigns

Campaigns to make consumers aware of **sustainability effects** are permissible.

Standard general terms and conditions

Jointly drawing up general terms and conditions can make contracting **easier**. This is allowed if the conditions do not concern competition parameters such as price, quality, or volumes.

Taking away switching barriers

By **working together**, producers can take away switching barriers between producer organizations. For example, think of standardization of reporting requirements regarding the realization of statutory obligations.

If you seek more information about collaborations and sustainability and which conditions apply, **read more about [arrangements between businesses regarding sustainability](#)** (in Dutch).
